

SIERRA VISTA METROPOLITAN PLANNING ORGANIZATION EMERGENCY PRE-EMPTION SIGNAL PROJECT

In partnership with ADOT's SouthCentral District, the Town of Huachuca City and the Whetstone Fire Dept., emergency pre-emption signals will be installed on Highway 90 to alert, slow and stop high-speed traffic on Highway 90 to allow faster response times for emergency services. This project will include advance signs, alerting the traveling public to the presence of two fire stations, and combine existing street lighting with the new mast arms.

Preliminary design is underway and installation is planned by the end of 2019.

| PROJECT TIMELINE: | PROJECT FUNDING: |
|---|---|
| Design and Scoping: January 2019 Contractor Selection: Spring 2019 Installation of Emergency Flashers: Summer 2019 Installation of Pre-Emptive Signal: Fall 2019 | Project Funded by State Transportation Program Funds Project selected for HURF Exchange Program allowing for Local Jurisdiction implementation of project. \$100,000 (STBG) |

PROJECT SCHEDULE SUBJECT TO CHANGE DUE TO WEATHER CONDITIONS, AVAILABILITY OF MATERIALS, SHIPPING SCHEDULE FOR MAST ARMS

ADDITIONAL INFORMATION

An emergency pre-emption signal is a way for emergency vehicles to obtain clear right-of-way prior to their arrival to an intersection. This allows those emergency vehicles to have faster response times and decreases conflicts with emergency services and the traveling public.

TRAFFIC SIGNAL CONTROLLED BY AN APPROACHING EMERGENCY VEHICLE (W11-12p)
