

SIERRA VISTA METROPOLITAN PLANNING ORGANIZATION

PAVEMENT CONDITION SURVEY PROJECT

The City of Sierra Vista, working with Infrastructure Management Services, developed a software tool that includes data and imagery from all of the City's maintained roadways. This information helps to prioritize maintenance activities on the roadways in the worst condition. It also helps to identify roadways that may be able to defer more expensive reconstruction activities until later. This project is almost completed: staff training will be scheduled and this project completed by summer of 2019.

PROJECT TIMELINE:

Notice of Award: December 2017
 Kick-Off Meeting: February 2018
 Draft Analysis Results: June 2018
 Roadway Imagery: July 2018
 Installation of Software/MicoPAVER: January 2019
 Public Works Staff Training: *Pending*

PROJECT FUNDING:

Project Funded by MPO Program Planning Funds
 \$63,685.00

PROJECT SCHEDULE SUBJECT TO CHANGE
